

Four Square

Game Suggestions:

Traditional Four Square

Accessories: Ball

Have a player stand in each square. Note that the highest-ranking square is square #4. The player standing in #4 is named King. They King always serves the ball.

The King serves the ball by bouncing it in their square once. Then hit it to the second square (#2). Make sure that the ball stays within the other square and is not on or outside of any lines. You can get out on a "serve".

Hit the ball back. Receivers must hit the ball back to any other player.

Continue playing until a player hits the ball out of the square or it bounces twice in the player's own square. This makes the player out. All other players serve as line judges if the ball hits the line and there is

a disagreement between the hitter and the receiver.

Shift the player who is out to the lowest level (#1) unless there is a line of people waiting to play, then the person who is out goes to the end of the line and the person next in line goes to the #1 square. When a player is out everyone moves up one square.
